Estimated Annual FAF Tonnage Flow for Trucks Carrying Liquid and Gases Commodities on National Highway System 2017

Note: Major flows include domestic and international freight moving by truck on highway segments with more than 25,000 FAF tons per year and between places typically more than fifty miles apart.

Flows include Crude petroleum (SCTG16), Gasoline (SCTG17), Fuel oils (SCTG18), and Coal-nec (SCTG19) commodities represented in FAF.
