Estimated Average FAF Daily Volumes for Trucks Carrying Durable Manufacturing (low tech) Commodities on National Highway System 2017

Note: Major flows include domestic and international freight moving by truck on highway segments with more than 25 FAF trucks per day and between places typically more than fifty miles apart.

Flows include Nonmetal min prods (SCTG31), Base metals (SCTG32), Articles-base metal (SCTG33), Machinery (SCTG34), and Furniture (SCTG39) commodities represented in FAF.
