WEATHER INFORMATION FOR SURFACE TRANSPORTATION (WIST II): ESTABLISHING THE NATIONAL NEEDS AND REQUIREMENTS

ABSTRACT:

OFCM and FHWA initiated a project, within the federal meteorological community, to identify the national weather needs and requirements for all surface transportation modes. In this venue, surface transportation consists of roadways, rail, waterways, and pipelines. Noted shortcomings were the absence of definitive information on the spatial and temporal scales required for decision processes, and the lack of any specific threshold for identified weather elements.
